Time taken 28 secs

Grade 0.50 out of 80.00 (1%)

Question 1

Partially correct

Mark 0.50 out of 1.00

When would you call the RFC function module synchronously?

There are 2 correct answers to this question.

Select one or more:

- a. During queue processing ✓
- b. During unidirectional communication ✗
- c. During two-way communication
- d. During interactive communication

The correct answers are: During queue processing, During two-way communication

Question 2

Not answered

Marked out of 1.00

You need to perform a downcast. What should you do?

There are 2 correct answers to this question.

Select one:

- a. Catch the exception CX_SY_MOVE_CAST_ERROR.
- b. “.
- c. Use the operator “
- d. Assign a subclass reference to a superclass reference.
- e. Perform the downcast only if an upcast has already been done for the object reference.

The correct answer is: “.

Question 3

Not answered

Marked out of 1.00

What is the purpose of the enqueue work process?

Please choose the correct answer.

Select one:

- a. It processes user entries
- b. It translates Open SQL statements
- c. It manages logical locks in the lock table
- d. It processes update requests

The correct answer is: It manages logical locks in the lock table

Question 4

Not answered

Marked out of
1.00

Where should the labels for fields be stored?

Please choose the correct answer.

Select one:

- a. Structure
- b. Table
- c. Field
- d. Data element
- e. Domain

The correct answer is: Data element

Question 5

Not answered

Marked out of
1.00

Which of the following can you do with the ABAP debugger?

There are 3 correct answers to this question.

Select one or more:

- a. Analyze memory usage.
- b. Analyze internal tables
- c. Compare data objects.
- d. Analyze SQL traces.
- e. Change source code.

The correct answers are: Analyze internal tables, Compare data objects., Analyze memory usage.

Question 6

Not answered

Marked out of
1.00

Which must a search help do?

There are 4 correct answers to this question.

Select one or more:

- a. Determine the values for selection by the user
- b. Allow the user to select a response
- c. Be used from a screen
- d. Use a table or a view for data selection
- e. Have a dialog with the user

The correct answers are: Be used from a screen, Have a dialog with the user, Determine the values for selection by the user, Allow the user to select a response

Question 7

Not answered

Marked out of
1.00

How do you create lock objects and lock modules for use in ABAP programs that access the database?

Please choose the correct answer.

Select one:

- a. Use the ABAP dictionary to create the lock objects. Use the function builder to create the lock modules
- b. Use the Function Builder to create the lock modules. The lock objects are created in the program logic
- c. Use the Function Builder to create the lock modules and the lock objects
- d. Use the ABAP Dictionary to create the lock objects. The lock modules are created automatically

The correct answer is: Use the ABAP Dictionary to create the lock objects. The lock modules are created automatically

Question 8

Not answered

Marked out of
1.00

You want to move a transport request from the development system to the subsequent system. Which of the following are prerequisites for this?

There are 2 correct answers to this question.

Select one or more:

- a. All objects included in the transport request must be activated.
- b. The extended program check must show no warnings.
- c. All tasks of the transport request must be assigned to the same user.
- d. The transport request must be released

The correct answers are: All objects included in the transport request must be activated., The transport request must be released

Question 9

Not answered

Marked out of
1.00

You are making changes to a program that already has a transaction code linked to it. Your colleague is testing the transaction in your development system. At what point can the changed version of the program be tested?

Please choose the correct answer.

Select one:

- a. When you perform a syntax check on the program
- b. When you release the transport requests for the program
- c. When you save the program
- d. When you activate the program

The correct answer is: When you activate the program

Question 10

Not answered

Marked out of
1.00

You need to create a piece of code that can be used by multiple programs.

Which of the following techniques for modularization does SAP recommend?

There are 2 correct answers to this question.

Select one or more:

- a. A method in a local class
- b. A function module in a function group
- c. A method in a global class
- d. A subroutine in a program

The correct answers are: A method in a global class, A function module in a function group

Question **11**
Not answered
Marked out of
1.00

Which types of programs or parts of programs can be tested directly from the ABAP Workbench or ABAP Editor?

There are 4 correct answers to this question.

Select one or more:

- a. CLASS-POOL
- b. METHOD
- c. FUNCTION-POOL
- d. REPORT
- e. INCLUDE
- f. INTERFACE-POOL
- g. PROGRAM
- h. FUNCTION MODULE
- i. TYPE-POOL

The correct answers are: REPORT, FUNCTION MODULE, METHOD, CLASS-POOL

Question **12**
Not answered
Marked out of
1.00

Which of the following can you use to enhance SAP standard tables and structures with fields?

There are 2 correct answers to this question.

Select one or more:

- a. Append search helps
- b. Customizing includes
- c. Append structures
- d. Field exits

The correct answers are: Append structures, Customizing includes

Question **13**
Not answered
Marked out of
1.00

You want to select all the records from a database table where field CITY contains substring 'BU' in any position. Which WHERE clause can you use in an Open SQL select statement?

Please choose the correct answer.

Select one:

- a. WHERE city LIKE '%BU*'
- b. WHERE city LIKE '%BU%'
- c. WHERE city LIKE '*BU*'
- d. WHERE city LIKE '_BU'

The correct answer is: WHERE city LIKE '%BU%'

Question 14

Not answered

Marked out of
1.00

Which statement will interrupt the processing of the current screen and branch to new screen?

Please choose the correct answer.

Select one:

- a. LEAVE TO SCREEN <NNNN>
- b. None of the above
- c. SET SCREEN <NNNN>
- d. CALL SCREEN <NNNN>

The correct answer is: CALL SCREEN <NNNN>

Question 15

Not answered

Marked out of
1.00

Which of the following statements can you use to setup checkpoints in an ABAP program?

There are 3 correct answers to this question.

Select one or more:

- a. LOG-POINT
- b. BREAK
- c. ASSERT
- d. BREAK_POINT
- e. CHECK

The correct answers are: LOG-POINT, ASSERT, BREAK_POINT

Question 16

Not answered

Marked out of
1.00

What is the difference between a value table and a check table?

Please choose the correct answer.

Select one:

- a. A value table is defined in the domain, whereas a check table is defined in the data element.
- b. A value table is a check table after a foreign key is defined.
- c. A check table is defined in the domain, whereas a value table is defined in the data element.
- d. A value table does not exist.
- e. No difference; they are the same thing.

The correct answer is: A value table is a check table after a foreign key is defined.

Question 17

Not answered

Marked out of
1.00

Which of the following features do you have to consider when you use shared objects?

There are 3 correct answers to this question.

Select one or more:

- a. Memory bottlenecks result in runtime errors and have to be caught
- b. Data is saved as attributes of objects
- c. Concurrent write accesses are supported
- d. Concurrent read accesses are supported
- e. Data is saved as tables of objects

The correct answers are: Concurrent read accesses are supported, Data is saved as attributes of objects, Memory bottlenecks result in runtime errors and have to be caught

Question **18**
Not answered
Marked out of
1.00

You want to use a BAdI to extend the functions of an SAP program. Which of the following tasks is necessary?

Please choose the correct answer.

Select one:

- a. Call the BAdI
- b. Implement a class that implements the BAdI interface.
- c. Create an enhancement project using a customer exit.
- d. Define an interface for the BAdI.

The correct answer is: Implement a class that implements the BAdI interface.

Question **19**
Not answered
Marked out of
1.00

How would you find out if an application program offers a program exit?

Please select all the correct answers that apply.

Select one or more:

- a. Use the Repository Information System
- b. Use the Application Hierarchy
- c. Look for a customer exit in the SAP reference IMG within an application area
- d. Search for the character string CUSTOMER-FUNCTION

The correct answers are: Search for the character string CUSTOMER-FUNCTION, Use the Repository Information System, Look for a customer exit in the SAP reference IMG within an application area, Use the Application Hierarchy

Question **20**
Not answered
Marked out of
1.00

In which circumstances is a table considered to be a text table?

There are 3 correct answers to this question.

Select one or more:

- a. This table has an additional language key field.
- b. The entire key of this data table is included as the key to this table.
- c. The ABAP runtime system determines that the relationship exists.
- d. This table only has one character-based data field.
- e. This table has a foreign key to the data table as a text table.

The correct answers are: This table has a foreign key to the data table as a text table., The entire key of this data table is included as the key to this table., This table has an additional language key field.

Question **21**
Not answered
Marked out of
1.00

Which events can exist in all types of programs that actually contain executable statements?

Please choose the correct answer.

Select one:

- a. LOAD-OF-PROGRAM
- b. INITIALIZATION
- c. AT USER-COMMAND
- d. START-OF-SELECTION
- e. AT PF
- f. AT LINE-SELECTION

The correct answer is: LOAD-OF-PROGRAM

Question 22

Not answered

Marked out of
1.00

How can you add a session breakpoint to your program?

There are 2 correct answers to this question.

Select one or more:

- a. Set a breakpoint in the ABAP editor
- b. Execute command /h
- c. Set a breakpoint in the ABAP editor and select Save.

The correct answers are: Execute command /h, Set a breakpoint in the ABAP editor

Question 23

Not answered

Marked out of
1.00

What is the allowed length of the ABAP Dictionary data type DF34_RAW?

Please choose the correct answer.

Select one:

- a. The allowed length is between 1 and 34 digits.
- b. The allowed length is 34 digits.
- c. The allowed length is between 1 and 31 digits.
- d. The allowed length is between 0 and 33 digits.

The correct answer is: The allowed length is 34 digits.

Question 24

Not answered

Marked out of
1.00

Which hook method exists for all controller types?

Please choose the correct answer.

Select one:

- a. wddobeforenavigation()
- b. wddoonopen()
- c. wddoonclose()
- d. wddoinit()

The correct answer is: wddoinit()

Question 25

Not answered

Marked out of
1.00

Where can you define data types that can be accessed directly by all ABAP repository objects in an SAP system?

There are 2 correct answers to this question

Select one or more:

- a. In the ABAP dictionary
- b. In a global class
- c. In a method
- d. In a function module

The correct answers are: In a global class, In the ABAP dictionary

Question 26

Not answered

Marked out of
1.00

When included in a structure, which elementary field types allow the structure to be considered a character-type data object?

There are 4 correct answers to this question.

Select one or more:

- a. F
- b. X
- c. C
- d. XSTRING
- e. STRING
- f. I
- g. D
- h. T
- i. N

The correct answers are: C, D, N, T

Question 27

Not answered

Marked out of
1.00

You add the CREATE PROTECTED addition to a class definition.

From where you can instantiate the class?

There are 3 correct answers to this question.

Select one or more:

- a. From a parent class
- b. From any protected class
- c. From a friend class
- d. From the class itself
- e. From a child class

The correct answers are: From a child class, From the class itself, From a friend class

Question 28

Not answered

Marked out of
1.00

Which of the following is a true statement?

There are 2 correct answers to this question.

Select one or more:

- a. A hashed table should always have a unique table key.
- b. A standard table should always have a multiple key.
- c. A standard table should always have a unique key.
- d. A sorted table can have a unique or a non-unique key.

The correct answers are: A sorted table can have a unique or a non-unique key., A hashed table should always have a unique table key.

Question 29

Not answered

Marked out of
1.00

How can Unicode checks be made?

There are 2 correct answers to this question.

Select one or more:

- a. Only in a Unicode system or as part of a conversion to a Unicode system
- b. By running Transaction UCHECK
- c. In any system (after release 6.10) by specifying the program has Unicode checks active
- d. Cannot be enforced

The correct answers are: In any system (after release 6.10) by specifying the program has Unicode checks active, By running Transaction UCHECK

Question 30

Not answered

Marked out of
1.00

The software component for a customer package can be...

Please choose the correct answer.

Select one:

- a. Database layer
- b. HOME
- c. Application Layer
- d. Any SAP software component (i.e., SAP_APPL, SAP_BASIS, SAP_HR, etc.)

The correct answer is: HOME

Question 31

Not answered

Marked out of
1.00

Which of the following ABAP standard types are incomplete?

There are 2 correct answers to this question.

Select one or more:

- a. N
- b. F
- c. STRING
- d. X

The correct answers are: X, N

Question 32

Not answered

Marked out of
1.00

What is the purpose of implicit enhancement points?

Please choose the correct answer.

Select one:

- a. To add fields to an SAP database table
- b. To add code to a standard SAP program
- c. To create a secondary index for an SAP database table
- d. To change code in a standard SAP program

The correct answer is: To add code to a standard SAP program

Question 33

Not answered

Marked out of
1.00

Which of the following functions does the ABAP Dispatcher perform?

There are 2 correct answers to this question.

Select one or more:

- a. It enables communication between SAP systems and external application systems.
- b. It distributes user requests among available work processes.
- c. It directs HTTP requests from an SAP system to a web server.
- d. It communicates with other instances in the system.

The correct answers are: It distributes user requests among available work processes., It communicates with other instances in the system.

Question 34

Not answered

Marked out of
1.00

Which of the following regarding search helps is a true statement?

Please select all the correct answers that apply.

Select one or more:

- a. The interface for the search help is defined by the IMP (import) and EXP (export) flag of the search help parameter.
- b. The LPos parameter defines the position of the search help parameter in the search hit list.
- c. The text table for the selection method is automatically populated if the text table is attached to the database table being used as the selection method.
- d. The SPos parameter defines the position of the input field on the dialog screen.

The correct answers are: The SPos parameter defines the position of the input field on the dialog screen., The text table for the selection method is automatically populated if the text table is attached to the database table being used as the selection method., The interface for the search help is defined by the IMP (import) and EXP (export) flag of the search help parameter., The LPos parameter defines the position of the search help parameter in the search hit list.

Question 35

Not answered

Marked out of
1.00

If you are using external debugging (debugging of HTTP and RFC requests, which arrive in your ABAP system), what will the Debugger do?

Please choose the correct answer.

Select one:

- a. May or may not stop, depending on external factors.
- b. Never stop; external breakpoints operate on users other than your own.
- c. Do not stop when the external breakpoint is reached.
- d. Always stop when the external breakpoint is reached.

The correct answer is: May or may not stop, depending on external factors.

Question 36

Not answered

Marked out of
1.00

When is a foreign key check performed on an input/output field?

Please choose the correct answer.

Select one:

- a. If the field refers to the dictionary field for which a check table is defined
- b. If the field refers to the dictionary field for which a append search is defined
- c. If the field refers to the dictionary field for which a search is defined
- d. If the field refers to the dictionary field for which a value help is defined

The correct answer is: If the field refers to the dictionary field for which a check table is defined

Question 37

Not answered

Marked out of
1.00

To generate the function modules for a lock object for a custom table (ENQUEUE_ and DEQUEUE_), which tool would you use?

Please choose the correct answer.

Select one:

- a. Text Elements (Transaction SE32)
- b. General Table Maintenance Dialog (Transaction SE54)
- c. Function Builder (Transaction SE37)
- d. ABAP Dictionary (Transaction SE11)
- e. Reuse Library (Transaction SE83)

The correct answer is: ABAP Dictionary (Transaction SE11)

Question 38

Not answered

Marked out of
1.00

Each ABAP program starts with an introductory statement. Which statements are correct?

There are 2 correct answers to this question.

Select one or more:

- a. The introductory statement must be the first line in the program.
- b. The introductory statement can be modified.
- c. The introductory statement must be the first statement in the program.
- d. The introductory statement must never be modified.

The correct answers are: The introductory statement can be modified., The introductory statement must be the first statement in the program.

Question 39

Not answered

Marked out of
1.00

Each work process...

There are 3 correct answers to this question.

Select one or more:

- a. Uses a database connection to a work process established when the SAP NetWeaver Application Server ABAP started.
- b. Can make database changes spanning multiple database LUWs.
- c. Uses a pool of database connections established when the SAP NetWeaver Application Server ABAP started.
- d. Can only make database changes within a single database LUW.
- e. Is independent of other work processes.

The correct answers are: Can only make database changes within a single database LUW., Is independent of other work processes., Uses a database connection to a work process established when the SAP NetWeaver Application Server ABAP started.

Question 40

Not answered

Marked out of
1.00

What is the maximum number of watchpoints that can exist at one time?

Please choose the correct answer.

Select one:

- a. 6
- b. 8
- c. 10
- d. No limit

The correct answer is: 10

Question 41

Not answered

Marked out of
1.00

Which statement is used to generically define the data reference variable z1?

Please choose the correct answer.

Select one:

- a. data z1 type any table
- b. data z1 type any
- c. data z1 type ref to data
- d. data z1 type ref to PA0001

The correct answer is: data z1 type ref to data

Question 42

Not answered

Marked out of
1.00

Which of the following are true statements?

There are 3 correct answers to this question.

Select one or more:

- a. Table fields can be assigned to an ABAP Dictionary data type directly.
- b. Search helps can be defined for a table field that is assigned to a predefined data type.
- c. A reference table and field are required for fields with the data types QUAN and CURR.
- d. Table fields can be assigned to a data element.

The correct answers are: A reference table and field are required for fields with the data types QUAN and CURR., Table fields can be assigned to an ABAP Dictionary data type directly., Table fields can be assigned to a data element.

Question 43

Not answered

Marked out of
1.00

You create a function group ZATP. What is the name of the corresponding main program?

Please choose the correct answer.

Select one:

- a. SAPLZATP
- b. SAPFZATP
- c. ZATP
- d. SAPMZATP

The correct answer is: SAPLZATP

Question 44

Not answered

Marked out of
1.00

Which of the following statements regarding the event AT SELECTIONSCREEN ON HELP-REQUEST FOR is correct?

Please choose the correct answer.

Select one:

- a. None of the above.
- b. This event will display (F1) help for the input field on the selection screen.
- c. This event will display self-defined (F1) help for the input field programmed in the event block and will override any help possibly defined in the ABAP Dictionary for the field.
- d. This event will display self-defined (F1) help for the output field programmed in the event block and will override any help possibly defined in the ABAP Dictionary for the field.

The correct answer is: This event will display (F1) help for the input field on the selection screen.

Question 45

Not answered

Marked out of
1.00

You can use the logical expression IS SUPPLIED for any formal parameter passed to which modularization unit?

There are 3 correct answers to this question.

Select one or more:

- a. Subroutine (FORM routine)
- b. Instance method
- c. Static method
- d. Function module

The correct answers are: Instance method, Function module, Static method

Question 46

Not answered

Marked out of
1.00

Which of the following rules must you follow when creating subscreens?

There are 2 correct answers to this question.

Select one or more:

- a. Subscreens can call other subscreens.
- b. Subscreens CANNOT have an AT EXIT-COMMAND module.
- c. Subscreens CANNOT have a field of type OK.
- d. Subscreens can have a dialog module containing SET PF-STATUS.

The correct answers are: Subscreens CANNOT have a field of type OK., Subscreens CANNOT have an AT EXIT-COMMAND module.

Question 47

Not answered

Marked out of
1.00

Each component has an interface; of what does this interface consist?

There are 2 correct answers to this question.

Select one or more:

- a. Interface controller
- b. Interface view
- c. Interface context
- d. Data Container

The correct answers are: Interface controller, Interface view

Question 48

Not answered

Marked out of
1.00

You are asked to enhance the GUI status of an SAP standard application. How do you identify which menu exit function code you can use?
Please choose the correct answer.

Select one:

- a. It starts with an ampersand (&)
- b. It starts with an asterisk (*)
- c. It starts with a dollar(\$)
- d. It start with a plus (+)

The correct answer is: It start with a plus (+)

Question 49

Not answered

Marked out of
1.00

You display the content of an internal table using an ALV grid control. The content of the internal table changes during the program. Which CL_GUI_ALV_GRID class method can you use to display the changed content?

Please choose the correct answer.

Select one:

- a. REFRESH_TABLE_DISPLAY in module PAI
- b. REFRESH_TABLE_DISPLAY in module PBO
- c. SET_TABLE_FOR_FIRST_DISPLAY in module PAI
- d. SET_TABLE _FOR_FIRST_DISPLAY in module PBO

The correct answer is: REFRESH_TABLE_DISPLAY in module PBO

Question 50

Not answered

Marked out of
1.00

Which of the following are valid control level changes within a loop over an internal table?
There are 2 correct answers to this question.

Select one or more:

- a. LAST
- b. SUM
- c. COLLECT
- d. END of

The correct answers are: LAST, END of

Question 51

Not answered

Marked out of
1.00

What is the correct order for using a lock object?
Please choose the correct answer.

Select one:

- a. release the lock, Read the data, set the lock, change the data
- b. Set the lock, read the data, release the lock, change the data
- c. Read the data, set the lock, change the data, release the lock
- d. Set the lock, read the data, change the data, release the lock

The correct answer is: Set the lock, read the data, change the data, release the lock

Question 52

Not answered

Marked out of
1.00

Where can you define global data types that are visible system-wide?

There are 3 correct answers to this question.

Select one or more:

- a. In a global interface
- b. In a method of a global class
- c. In a function module
- d. In the ABAP Dictionary
- e. In a global class

The correct answers are: In a global class, In a global interface, In the ABAP Dictionary

Question 53

Not answered

Marked out of
1.00

Which statements are allowed for processing internal tables?

There are 3 correct answers to this question.

Select one or more:

- a. UPDATE
- b. MODIFY
- c. INSERT
- d. SELECT
- e. DELETE

The correct answers are: MODIFY, DELETE, INSERT

Question 54

Not answered

Marked out of
1.00

Which of the following are key capabilities of SAP NetWeaver?

There are 3 correct answers to this question.

Select one or more:

- a. Supply Chain Management
- b. Information Integration
- c. Enterprise Resource Planning
- d. Application Platform
- e. People Integration

The correct answers are: Application Platform, Information Integration, People Integration

Question 55

Not answered

Marked out of
1.00

With what can you simulate multiple inheritance?

Please choose the correct answer.

Select one:

- a. INHERITING FROM
- b. REDEFINITION
- c. CLASS CATEGORY
- d. INTERFACES

The correct answer is: INTERFACES

Question 56

Not answered

Marked out of
1.00

How many kinds of internal tables are supported in the ABAP language?

Please choose the correct answer.

Select one:

- a. 3
- b. 2
- c. 1
- d. 5

The correct answer is: 3

Question 57

Not answered

Marked out of
1.00

Which statements are true about a class that has granted friendship to another class?

There are 4 correct answers to this question.

Select one or more:

- a. All classes that inherit from the friend (subclasses) also have the same access.
- b. The friend has access to protected attributes.
- c. The friend has access to public attributes.
- d. The friend has access to private attributes.
- e. All classes the friend has granted friendship access status to also have the same access.

The correct answers are: The friend has access to private attributes., The friend has access to public attributes., All classes that inherit from the friend (subclasses) also have the same access., The friend has access to protected attributes.

Question 58

Not answered

Marked out of
1.00

Which prerequisites must be fulfilled before a repository object can be transported?

There are 3 correct answers to this question.

Select one or more:

- a. The repository object must be assigned to a change request.
- b. The repository object must be assigned to a package.
- c. An inactive version of the repository object must exist.
- d. A transport layer must be assigned to the package.
- e. An application component must be assigned to the repository object.

The correct answers are: The repository object must be assigned to a change request., The repository object must be assigned to a package., A transport layer must be assigned to the package.

Question 59

Not answered

Marked out of
1.00

What can you enhance using BAdIs?

There are 3 correct answers to this question.

Select one or more:

- a. Menus
- b. Screens
- c. Data elements
- d. Source code
- e. Database tables

The correct answers are: Menus, Source code, Screens

Question **60**

Not answered

Marked out of
1.00

Which of the following statements are correct?

There are 3 correct answers to this question.

Select one or more:

- a. An enhancement spot can contain an explicit enhancement point and an enhancement section.
- b. An enhancement spot can contain either an explicit enhancement point and enhancement section or a new BAdI only, but all three cannot be in the same enhancement spot.
- c. An enhancement spot can contain an explicit enhancement point, explicit enhancement section, and new BAdI.
- d. An enhancement spot can contain one or more simple or composite enhancements.

The correct answers are: An enhancement spot can contain one or more simple or composite enhancements., An enhancement spot can contain an explicit enhancement point and an enhancement section., An enhancement spot can contain either an explicit enhancement point and enhancement section or a new BAdI only, but all three cannot be in the same enhancement spot.

Question **61**

Not answered

Marked out of
1.00

Which of the following generic types can you use to define a field symbol that will be assigned to a character string?

There are 3 correct answers to this question

Select one or more:

- a. Type any
- b. Type any table
- c. Type csequence
- d. Type xsequence
- e. Type clike

The correct answers are: Type clike, Type any table, Type csequence
